

ARCHE NOAH HOME Philippines

BUILDING A DREAM, FINDING A VOICE— Kent has been part of Arko ni Noah since 2013, when he was still in elementary school. Back then, becoming an engineer or architect felt like a dream too far to reach. Today, he looks back with gratitude— not only because he is now a licensed civil engineer, it's because along the way, he found a family that supported and believed in him. *“Arche Noah became a place where I learned that dreams can become reality, and where I could freely express myself and be heard,”* he shares. For Kent, reaching his dream is also a reminder of the people who walked with him and helped him find his way.

A HOME THAT GROWS WITH US

As the Arko ni Noah family continues to grow, our home is growing with it. What was once a one-storey house has now been renovated and expanded into three levels, including a roof deck, giving the children more space to live, learn, play, and simply be together.

With more children becoming part of the family, we needed a space that could grow alongside them. More than just having a bigger home, we hope to create a place where every child feels safe, heard, supported, and free to express themselves— a place they can truly call home.

As our family continues to grow, so do our hopes and dreams for every child who calls Arche Noah their home. We are grateful to everyone who continues to walk this journey with us.

THREE LITTLE WORDS

Our two youngest children are both eight years old and are still finding their place in the home and family. One day, they were simply told, “I love you.” They smiled and seemed surprised and did not know what to say. When asked about it later, they shared that they were not used to hearing those words before.

It was a simple moment, yet one that reminded us of what we hope home can mean for every child— a place where they can experience love and care, feel safe expressing what is alive in them, and know that they are heard and valued.

Sometimes, even three little words can be the beginning of something meaningful.
